Managed Endpoint Detection and Response

Reduce attack surface risk with Managed Endpoint Detection and Response

OVERVIEW

Deepwatch understands that security is a collaborative process. We work closely with our customers to establish strong foundations for maturing Security Operations (SecOps) programs. As the leading managed security platform for the cyber resilient enterprise, we have redefined the managed security services industry.

ADVANTAGE

The Deepwatch Managed Endpoint Detection & Response (MEDR) Service allows customers to take advantage of our deep bench of security expertise and our best-of-breed endpoint detection solutions. We help our customers enhance their cyber defense capabilities to advance from purely reactive threat defense to a more proactive deterrence against sophisticated threat actor Tactics, Techniques, and Procedures (TTPs).

MANAGED ENDPOINT DETECTION AND RESPONSE

- ✓ **24/7/365 Deepwatch Experts:** Continuous alert monitoring, validation, and escalation
- ✓ **Dashboards & Reports:** Preconfigured and custom reports to build better narratives with stakeholders
- ✓ **Continuous Threat Hunting:** Gain visibility across your endpoints to stop threats and significantly reduce adversary dwell time
- ✓ **Patented Deepwatch Security Index:** Leverage Deepwatch's proprietary methodology to proactively improve your security posture
