

FIVE USE CASES FOR DEEPWATCH DARK WEB MONITORING AND RESPONSE

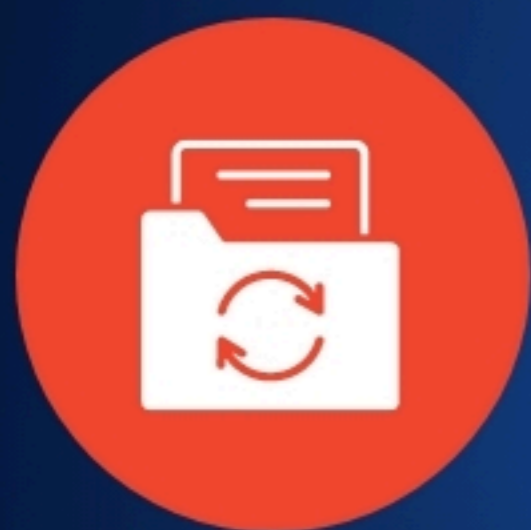

CREDENTIAL COMPROMISE & ACCOUNT TAKEOVER MITIGATION

Rapid detection and neutralization of exposed corporate credentials with automated password resets.

THREAT ACTOR MONITORING

Detect early-stage planning of ransomware or phishing campaigns referencing your brand or assets.

DATA LOSS DETECTION

Spot leaked source code, internal documents, or IP before they're weaponized or sold.

BRAND PROTECTION

Identify counterfeit sites, domain impersonation, or fake social media accounts damaging brand trust.

TAKEDOWN SERVICES

Rapid takedown of phishing websites, fraudulent domains, and impersonation accounts to prevent exploitation and protect customers.
