DEEPWATCH™
Always Watching. Always Protecting.

SOLUTION BRIEF

Deepwatch Dark Web Monitoring & Response

Actionable Intelligence. Curated Alerts. Proactive Defense.

OVERVIEW

In today's cyber threat landscape, attackers don't wait for an open door—they steal keys. Deepwatch Dark Web Monitoring & Response (DWMR) delivers actionable visibility into cybercriminal activity across the open, deep, and dark web, including private forums and encrypted messaging apps. Unlike traditional threat feeds that offer noise, DWMR surfaces what matters—curated, contextualized alerts enriched with detailed insight and automated response options.

Deepwatch DWMR empowers customers to shift left of boom (before an attack)—detecting threats before damage occurs and automating protection as soon as leaked data surfaces.

WHY DEEPWATCH DARK WEB MONITORING RESPONSE?

Curated, High-Fidelity Intelligence
DWMR doesn't just generate alerts. It filters, enriches, and prioritizes intelligence—backed by Deepwatch Expertise—to reduce investigation overhead and provide clear, actionable insights. From leaked credentials to mentions of your brand in criminal forums, DWMR highlights what's real and removes the noise.

Machine-Speed Response + Deep Expertise
The platform combines automation and customizable workflows with Deepwatch Expertise. For example, leaked credentials trigger automatic password resets via identity provider integrations, closing attack windows in real time. Every alert includes severity scoring and context, enabling fast, accurate decisions.

Deepwatch MDR Integration
Unlike siloed tools, DWMR is natively integrated into Deepwatch's MDR workflows, empowering threat intel, SOC, and incident response teams to operationalize findings efficiently and consistently.

KEY CAPABILITIES

Real-Time Monitoring Across Hidden Threat Surfaces:

✓ Covers Clear, Deep, and Dark Web + instant messaging apps and private forums

✓ Surfaces exposed credentials, brand impersonation, stolen IP, targeted threats to high-value individuals and systems, and attacker chatter

Automated Remediation Options:

✓ Identity integrations (e.g., Okta) for automatic password resets

✓ Customizable approval mechanisms for customer-controlled responses

Prioritized, Enriched Alerts and Deepwatch Experts

✓ Risk scoring, source intel, and analyst summaries

✓ Detailed context on threat actor, method, and likely intent

✓ Exportable reports and Deepwatch Expert oversight

CUSTOMER VALUE

Business Benefits

- Proactive defense against breaches
- Reduced brand, financial, and regulatory risk
- Extends MDR visibility beyond internal telemetry
- Compliance support for GDPR, HIPAA, etc.

Technical Benefits

- Integrated remediation & analyst insight
- Alert fidelity reduces investigation fatigue
- Identity-driven workflows close the loop on account takeover risks
- Detection of early indicators of compromise (IOC)

WHY NOW?
WHY DEEPWATCH?

The consequences of doing nothing are steep: identity theft, regulatory penalties, financial loss, and public breach headlines. DWMR goes beyond alerts—it gives you clarity, speed, and confidence in the fight against cyber threats.

With Deepwatch, you're not just seeing threats earlier—you're stopping them faster.

DWMR is available exclusively as a Deepwatch MDR add-on, ensuring deep integration with your existing workflows.

USE CASES

1. **Credential Compromise & Account Takeover Mitigation:** Rapid detection and neutralization of exposed corporate credentials with automated password resets.
2. **Threat Actor Monitoring:** Detect early-stage planning of ransomware or phishing campaigns referencing your brand or assets.
3. **Data Loss Detection:** Spot leaked source code, internal documents, or IP before they're weaponized or sold.
4. **Brand Protection:** Identify counterfeit sites, domain impersonation, or fake social media accounts damaging brand trust.

WHO BENEFITS

- **Security Operations Teams:** SOC Directors, Threat Intel Managers, Security Analysts needing fast, enriched threat visibility.
- **Security Leaders:** CISOs, VPs, and Directors looking to reduce cyber risk, protect brand equity, meet regulatory compliance requirements and demonstrate proactive security posture.
- **Target Verticals:** Financial Services, Healthcare, Retail, Manufacturing and other MDR customers seeking stronger integration and automation along with compliance with regulatory requirements.

ABOUT DEEPWATCH

Deepwatch® is the pioneer of AI- and human-driven cyber resilience. By combining AI, security data, intelligence, and human expertise, the Deepwatch Platform helps organizations reduce risk through early and precise threat detection and remediation.
