

FIVE REASONS

Deepwatch MDR + Google SecOps

BETTER TOGETHER

This combined solution empowers enterprises to stay ahead of evolving threats with proactive, automated, and expert-led security operations—delivering stronger security posture and business value.

01

END-TO-END THREAT PROTECTION:

Delivers unified, always-on security operations that detect, investigate, and respond to threats across the entire enterprise environment

02

AI-DRIVEN EFFICIENCY & AUTOMATION:

Leverages advanced AI, ML, and hyper automation to automate threat detection and response, and significantly reduce false positives and analyst workload

03

UNIFIED VISIBILITY & RAPID RESPONSE:

Customers gain a single, transparent platform for end-to-end visibility with curated detections and dynamic risk scoring, resulting in sub-minute response times and measurable reductions in risk and dwell time

04

SECURITY EXPERTISE & TECHNOLOGY AT SCALE:

Deepwatch's security experts understand customer **risk profile** and deliver contextual analysis, and recommendations, while **SecOps provides the foundation for scalable, resilient, and compliant security operations**

05

ACCELERATED SECURITY MATURITY & REDUCED COSTS:

Faster onboarding, simplified operations, and measurable improvements in security posture—**achieving cost savings with 1st year SecOps includes 12 months hot data retention**

Human-driven, AI-enabled MDR

Deepwatch® is the pioneer of AI- and human-driven cyber resilience. By combining AI, security data, intelligence, and human expertise, the Deepwatch Platform helps organizations reduce risk through early and precise threat detection and remediation.
